MINESERVE 1000 SERVICE TRUCK

QUALITY ALWAYS COUNTS

Shermac has been manufacturing engineered-for-purpose service vehicles and water carts for Australia's mining, civil and commercial sectors since 2002. We have earned our reputation for excellence with heavy industry and government organisations alike.

But it's not only the quality, reliability and functionality of our high-performance vehicles that have driven our growth and the evolution of our range. What sets Shermac apart is our design, engineering and manufacturing expertise. However, the most crucial skill in our proven engineering process is our ability to listen, build long-term trusted relationships, and engineer the lowest lifetime cost-of-ownership vehicles and fleets available on the market.

This is what underpins our expertise in designing and delivering cost-effective, quality-assured solutions that drive performance capacity and add tangible operational and strategic value to your business. It's the foundation of our global sourcing and procurement network, which gives our clients access to the largest range of high-quality products at the lowest lifetime cost of ownership for fleet and bulk-purchasing clients. Shermac has three distinct divisions; Mining, Civil and Commercial - each dedicated to meeting the unique needs of different industries across Australia.

COST-EFFECTIVE CONFIGURATIONS

Some vehicle suppliers simply stock and sell standard vehicles. At Shermac, we have identified the optimum configuration for every application, which means you benefit from our years of experience, and will enjoy the lowest lifetime-cost-of-ownership on your new vehicle. We operate as three distinct divisions - Mining, Civil and Commercial - so we can meet the unique needs of different industries and operating environments across the country.

Before we consider models and specifications, we consult with you to establish your budget, operational and strategic requirements. Only then do we recommend and build the optimum configuration water cart or fleet that meets your needs.

PERFORMANCE, RELIABILITY, FLEXIBILITY

When it comes to keeping heavy duty assets on a mine site operational, the right service and support vehicles are needed. You need optimal tank capacities, fuel delivery rates, usability and maintenance, to ensure maximum uptime and productivity.

Our service trucks are built to handle any challenge; are designed and extensively tested to ensure they perform, even in the harshest conditions and the most remote environments. Whether you need to service bore fields, minor plant, fixed plant, or large mining plant, Shermac will design and engineer a vehicle to meet your specifications and operational requirements. Shermac service trucks offer the ultimate, reliable, user-friendly, on-site service solution.

NATIONWIDE SUPPORT

Our responsibility to you does not end when your vehicle leaves the workshop. We also operate an extensive after sales service, ready to respond wherever and whenever you need us. We stand by you and by our products, wherever you are in Australia

USABILITY

Shermac vehicles are designed specifically with usability and maintenance requirements in mind. For operators, controls and storage areas are ergonomic, easy to access, use, and clean.

FLEXIBILITY

Based on our consultation with you, Shermac will design and manufacture your service truck, ensuring it's built for purpose, so you know it's perfectly equipped to meet any challenge in the field. Shermac work with you to select the optimum configuration and design for your application.

SAFETY

Operator safety is always first at Shermac. Our service trucks are built to Australian Standards and are packed with safety features to help safeguard the operator.

RELIABILITY

Shermac stand by the components we use in our build, and the reliability of our products. Our service trucks are engineered to perform with heavy-duty use in the harshest conditions, maximising uptime and providing the lowest lifetime cost of ownership.

SELF-BUNDED DESIGN

Shermac truck bodies include an in-built sump for tank bunding, safeguarding you and the site in the unlikely event of a diesel or oil spill.

SERVICE ACCESS

Our user-friendly access stairs and railings are designed to AS 1657-1992, and provide safe and efficient access to service filter units from the top of the module.

DISPENSING SYSTEMS

Hydraulic or pneumatic dispensing systems are fitted in an enclosed compartment, with a one-piece, swing-up door providing robust security, weather protection and shade for the operator. Hose reels can be pneumatic, hydraulic, or spring rewind. Accessibility and safety are built into the design.

REFILL SYSTEM

We've engineered our trucks to make refilling simple and easy, with conveniently placed remote fill points.

STORAGE

All Shermac truck designs maximise storage space, with ample room for filters and tools in secure, weather-proof lockers.

LIGHTING

Configure the lighting solution that's right for your operations. We offer LED combination lights (high and low level), courtesy lights in the reel compartment and spare storage area on the left side, as well as operational HID work light solutions.

PAINT/APPEARANCE

Specify your vehicle's colour. We grit-blast and paint using a quality two-pack epoxy paint system internally and externally, with optional corrosion protection systems for operation in corrosive site conditions.

LIGHTWEIGHT

All Shermac's trucks bodies are manufactured to maximise durability and strength, while minimising vehicle weight. Lower weight means increased payload and reduced fuel costs, while maintaining structural integrity.

FILTRATION SYSTEM

Shermac recognise the requirements for fluid purity, and effective filtration in fluid delivery systems for diesel engines. The optional filtration system is engineered to deliver high standards of filtration. Filter units are conveniently placed for easy and safe servicing.

TANK GAUGE SYSTEM

Optional sonar tank level gauge systems allow the operator to see the tank levels with a single click of a button.

OPTIONAL IBC DISPENSING

The rear tray on Shermac's service trucks can be designed to accommodate an IBC tank with dispensing equipment for larger servicing needs.

CUSTOMISED FEATURES

Shermac provide a range of options that enable you to create the perfect service solution for your application, including:

- Cranes
- Extra storage trays
- Oxy kit
- Vice
- Work bench

TESTIMONIALS

SHERMAC WORK WITH OUR CLIENTS TO:

INCREASE their productivity **DECREASE** their machinery downtime **SAVE** on their ongoing operating costs **MINIMISE** their lifetime cost of ownership **INCREASE** their operational safety **INCREASE** their bottom line

“

“The end product was exactly how we hoped it would be delivered. Sales and Production were very easy to deal with, listening to what we required and delivered the product on time, as per quote and built to a quality standard we expected” “Shermac design vehicles differently. They have a knack for being able to reconfigure a truck so that, for example, where additional fuel tank capacity but less oil might be needed, they can come up with a design that provides this”

“

“Shermac were easy to deal with and supplied a high quality service truck body. The fitment to the truck was done quickly and without fuss. I would highly recommend Shermac to anyone” “Shermac were professional and knowledgeable throughout the whole quote, design and build process. They were fully accountable for the build and delivered it on time, to budget and with great quality” “Great company to deal with, very professional in all aspects of the contract, superb quality and workmanship, would highly recommend them”
